

# Adding images to your content

## Authoring Content

Enriching your articles with images in [HelpCenter.io](https://helpcenter.io) is a straightforward process. Here's how to add visuals to your content:

1. Upload an Image: While crafting your article, click anywhere within the article editor to place the cursor at the desired location for your image. Then, expand the side toolbar by clicking on the toggle icon (+) that appears at the beginning of the selected line. From the options that appear, select "Image". This will automatically open the file explorer of your system, allowing you to select and upload the image you wish to add to your article.

2. Copy and Paste an Image: You also have the option to add images by copying and pasting them directly into your content. Locate the image you wish to include, copy it, then navigate back to your article and paste the image at the desired location in your content.

By incorporating these simple steps, you can significantly enhance the visual appeal of your articles, creating a more immersive and informative experience for your readers.
