

Adjust the SEO meta tags of your articles

Authoring Content

By default, [HelpCenter.io](https://helpcenter.io) uses the article title and parts of the article description to create meta title and description tags for SEO.

However, if you would like to set your own meta title and meta description tags, you can easily do it from the article settings modal. Here is how.

1. Create a new article or open an existing one in the article editor.
2. Click on the little gear icon at the bottom left corner of the article editor sidebar.

The screenshot displays the article editor sidebar with the settings modal open. The modal title is "Adjust the SEO meta tags of your articles". The content of the modal includes the following text:

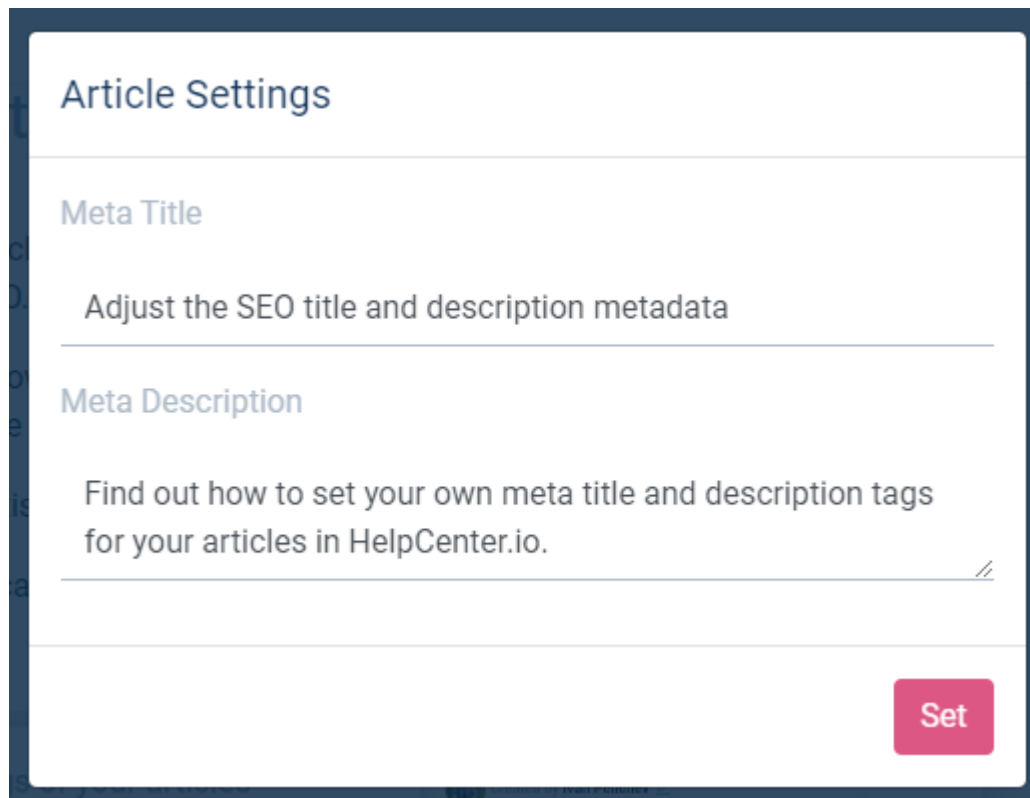

By default, [HelpCenter.io](https://helpcenter.io) uses the article title and parts of the article description to create meta title and meta description tags for SEO.

However, if you would like to set your own meta title and meta description tags, you can easily do it from the article settings modal. Here is how.

1. Create new article or open an existing one in the article editor.
2. Click on the little gear icon you can see at the bottom left corner of the article editor sidebar.
- 3.

The sidebar on the right shows the article settings. At the bottom left corner of the sidebar, a gear icon is highlighted with a red square, indicating where to click to open the settings modal.

3. This will open the article setting modal, where you can set your title and description for SEO purposes.

Adjust the SEO title and description metadata

Meta Description

Find out how to set your own meta title and description tags for your articles in HelpCenter.io.

Set

4. Once you are ready, confirm the values by pressing the **Set** button.

Remember to **Save/Update** your article once you set the custom title and description. Otherwise, the values you have entered in that modal won't stick.

It is important to hit **Save** or **Update** on your article once you **Set the** custom meta title and description.
