

# Create your first help center

## Build your help center

Creating your first help center happens during the signup. You only have to decide on a good subdomain for it and you are ready to go with customizing it and filling it with some helpful content:

Choose your subdomain

your-project .helpcenter.io

Previous Ready? Let's Start!

Creating your first help center

The screenshot shows a light gray background with the text "Choose your subdomain" in a light blue font. Below this, the subdomain "your-project" and the domain ".helpcenter.io" are displayed in a large, light blue font, separated by a thin horizontal line. At the bottom, there are two buttons: a white button with a gray border labeled "Previous" and a solid pink button labeled "Ready? Let's Start!".

The subdomain should be the name of your business or something else short that best describes the content and the purpose of the help center you are creating.
