

# Enable the Zendesk integration

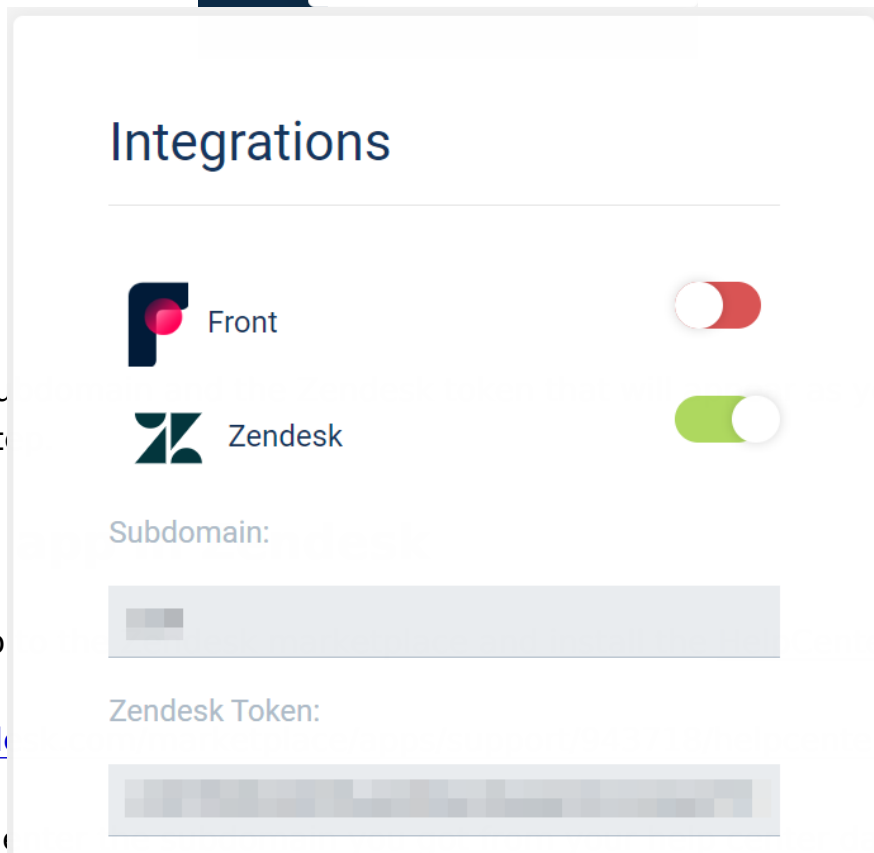

## Integrations

To [enable the Zendesk integration](#) inside [HelpCenter.io](#), login to your help center dashboard and navigate to the settings pages:

Then, under **Integrations**, go to the Zendesk integration and toggle the toggle in front of the Zendesk integration.

Enable the Zendesk integration by switching the toggle.

Take note of the subdomain and token values shown in the next step.

## Install our app

Next step is to go to the [Zendesk](#) dashboard.

<https://www.zendesk.com>

When prompted, click on the 'Integrations' link in the top right corner of the dashboard.

You will need these values:

[Subdomain](#) app:

[Token](#)

Copy the subdomain and token values from the dashboard into the

**Subdomain** field in Zendesk, and the **Zendesk Token** into the **Integration token** field in the app installation screen.

Subdomain\*

The subdomain of your help center in HelpCenter.io.

Integration token\*

You can receive this token from your HelpCenter.io dashboard when you enable the Zendesk integration in the settings of your help center.

Once done, see [HelpCenter.io](#) a

will enable the
