Remove "Powered by HelpCenter.io"

Design and templates

Yes, on every plan. "Powered by HelpCenter.io" is part of your Footer component, and one switch hides it.

1. In the left menu, click **Template editor**. Open **Pages** and pick the **Footer** region.
2. Click **Footer** to edit it.
3. Open **Advanced** and turn off **Show attribution**.
4. Click **Publish**.

Show attribution sits under Advanced, at the end of the Footer's settings.

The footer is synced across all pages by default, so one change covers every page. The switch hides the whole attribution line, including the copyright year and brand name that share it.

Using Compass? Its **Show attribution** is already off. Its credit, "Made with Compass · by HelpCenter.io", is an HTML column in the Footer instead. Under **Footer columns**, click the trash icon on that **HTML** column, or edit its HTML, then publish.

The widget has its own badge. Click the gear icon, then **Embeddables**. Under **Appearance**, turn on **Remove HelpCenter.io branding** and click **Save changes**.
